OF ANAESTHETISTS IN TRAINING

SECURE

Service Evaluation of Cross-Specialty
UK Rapid Sequence Intubation Events

Are you a team member for intubations?

SECURE RSI 14 day Activity Survey Coming soon!

This hospital is participating in SECURE, an observational study of user-defined RSI events and immediate complications across anaesthesia, intensive care and emergency medicine.

The study window in this hospital is:

We are asking you to record:

- **User-defined RSIs - any intubation deemed to be an RSI (or modified RSI) by the intubating team**

Inclusion criteria

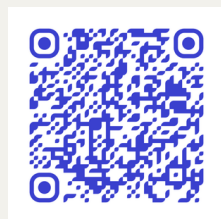

- In-hospital
- Patients ≥ 18 years (known or believed)
- By anaesthetic, emergency medicine and/or critical care teams
- Repeat RSIs in the same patient can be included as a new event

Exclusion criteria

- Out-of-hospital
- Patients < 18 years of age (known or believed)
- Not by anaesthetics, emergency medicine or critical care teams
- Patients with a tracheostomy
- Intubations during cardiac arrest

How to get involved:

- **Fill in the activity survey for all user-defined RSI intubations during this period**
- **Ideally by a member of the intubating team, as soon as possible**
- **Find the electronic survey form via this QR code**

- **Also available at https://redcap.link/secure_activity**

- **Our department site lead is:**
